

R. Gram Hill, UI Designer

Neuroscientist-turned-UI designer with a strong creative sense and a commitment to being a reliable and valuable team member. Interested in turning projects that are practical but mundane into work that is both intuitive and aesthetically pleasing. Skilled in taking a user-centric approach to target a specific audience and create engaging user experiences.

PROJECTS

Piggy, Financial Mobile App Design

CareerFoundry Case Study, 2022

- Designed a responsive mobile app which provides financial advice for users who are intimidated by working with their finances
- Created a brand identity and defined a visual style which communicates reliability as well as accessibility
- Conducted user research, produced interactive prototypes with InVision, analyzed usability testing results and implemented feedback to create an intuitive user experience
- Applied a mobile-first approach to construct pixel-perfect interface designs with Sketch
- View project: <http://rgramhill.com/piggy.html>

Scoob, Location-based Recommendation App Design

CareerFoundry Case Study, 2022

- Employed a user-centric design process to develop the interface for an app that helps users find nearby resources for their dogs and connect with other dog owners
- Performed a competitive analysis and user research before creating a series of user personas and a user flow diagram
- Created wireframes and an interactive prototype with InVision to conduct user testing
- Established a style guide and used Sketch to build responsive screen layouts for mobile, tablet, and desktop use
- View project: <http://rgramhill.com/scoob.html>
